EDUCATION

Michigan State University, East Lansing, MI May 2029
Bachelor of Arts, Information Science and Experience Architecture

Coursework: Researching Experience Architecture, Information Architecture, Web Authoring, Web Design and Development, Digital Graphic Design

EXPERIENCE

UX Design Assistant Apr. 2026 – Present
MSU Libraries
- Wireframed, designed, prototyped and delivered 6 webpages in an agile environment as part of an ongoing complete UX/UI makeover for the libraries' websites.
- Designing scalable UI targeting baseline viewport breakpoints (320px, 767px, and 992px) for mobile, tablet, and desktop respectively, to maintain fluid layout adaptation across devices.
- Designing in accordance with WCAG 2.2 AA contrast guidelines to ensure legibility for all users.
- Collaborating in a cross-functional team with developers and accessibility specialists to constantly iterate through designs until handoff.

Independent Project Design Lead Feb. 2026 – Apr. 2026
Waggoner Financial
- Redesigned the UI of Waggoner employees' internal portal on desktop, adapting it for use on mobile devices as a digital assistant.
- Consistently tracking and updating the project plan while maintaining consistent communication with the client to ensure project direction is aligned towards a satisfactory MVP.

UX Design Intern May 2025 – Dec. 2025
Alchemy Software LLC
- Conceptualized UX and designed UI for new features to guide their implementation into the application "Half Full", a task management tool for productivity.
- Led the UI redesign for a visual refresh across the application with an effect of minimizing UX friction on the app by heuristically optimizing user flows.
- Created a color system for visual themes, giving users options between 4 color schemes with varieties depending on color choice, resulting in a selection range between 28 different themes.

Independent UX Designer Sep. 2025 – Nov. 2025
Waggoner Financial
- Designed for the project "TopGun", by Waggoner Financial and Imagine Software Consultancy, a data-driven web platform streamlining the recruitment lifecycle for Waggoner's hiring team.
- Wireframed, designed, and prototyped the CRM-style interfaces and user flows for recruitment management with features such as live analytics, job listing management, and candidate application management
- Wireframed and designed the candidate-sided careers homepage for Waggoner's active job listings.
